

DIGITAL FRONT DOOR

# Registration Accelerator

Patient intake made easy.

Simplify patient registration—and get your staff’s time back. The time from scanning, faxing, and filing patient forms. Calling patients (again and again) to verify their data.

Instead, avoid staff burnout and retain top talent to achieve a distinct advantage in today’s short-staffed market.

Automated, contactless patient intake allows your staff to focus on patient relationships, not paperwork.

## Registration Accelerator

Registration Accelerator is a patient-facing, mobile registration solution. Patients receive a text to scan their identity and insurance cards. The data from those cards—not just the screen shot—is automatically uploaded into Experian’s eCare NEXT® platform. That data is then validated against information already in the platform. This ensures you have the most accurate patient data from the start.

No app, no log in. Because the last thing you want is to create more calls for your staff.

## How this differs from other solutions

Little to no training required. Registration Accelerator connects to Experian’s eCare NEXT platform. Your staff will not have to learn a new software system or attend days (or weeks) of training classes that would only add to your administrative burden. Easy.

### Client Success Rates

**32%** Opened the registration link

**45%** Completed registration

### Benefits to you

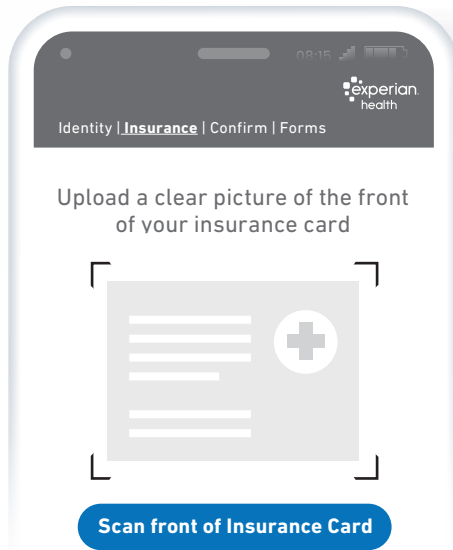

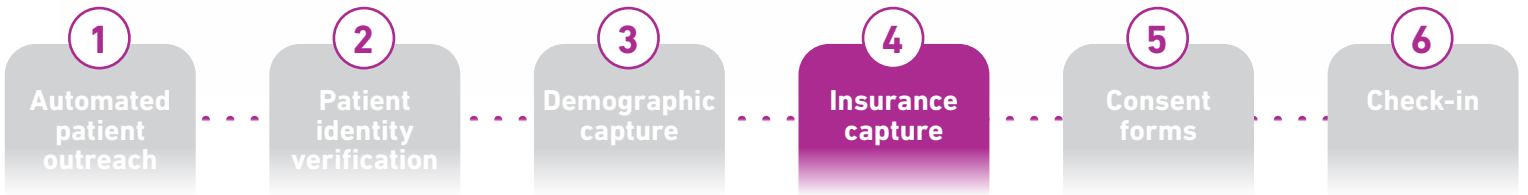

1. Optimize current staff resources with contactless registration.
2. Save time and costs with automated document upload.
3. Little to no training. Because no one has that time.

### Benefits to your patients

1. Reduce wait times.
2. No app. No login.
3. Register when convenient.

Registration Accelerator delivers a contactless patient data intake solution with data validation. Ask your rep for a live demo or visit [experian.com/health](https://experian.com/health).

## A seamless experience for every patient

**Real-time insurance eligibility verification**  
Data automatically flows into Experian Health's Eligibility product to verify insurance and plan benefits.
