The analysis is based on a statistically relevant sampling of data from Experian's consumer and business credit database from December 2015. The sample was based on a select business population where ethnic background was identifiable. Average scores are an average of the sample and are not representative of national averages of the consumer or small business. Ethnic background was obtained from Ethnic Technologies, a provider of multicultural marketing data, ethnic identification software and ethnic data appending services.

\*Based on a scale of 1 to 100 (with 100 being least risky); predicts the likelihood of severe delinquency (more than 91 days past due) within the next 12 months
