Power Data™

Power Data™ eliminates time-consuming manual tasks currently required to acquire data in the right format.

How we can help

Automates data delivery to free up valuable time for your teams

Facilitates deeper data analyses that identify opportunities for performance improvement

Standardizes data formatting to ease merging data within your HIS system and ingesting into your enterprise data warehouse

How it works

Power Data is an automated data ingestion platform that securely delivers data assets to your organization. Partner with your Experian Health team to determine the right cadence of data delivery: daily, weekly, or monthly. Our team will be there to actively monitor data extraction, ensuring you receive your data files accurately and on time.

Data Acquisition **without** Power Data

- Log in to Power Reporting portal
- Select report
- Click on detail tab
- Filter data by date
- Download data
- Manage/standardize file
- Ingest data into enterprise data warehouse

Data Acquisition **with** Power Data

- Retrieve file from your folder
- Ingest data into enterprise data warehouse
