

Passport NOA

Automate & integrate Notice of Admissions

Failure to meet payer Notice of Admissions (NOA) requirements lowers reimbursement rates and delays payments. The risk is high, and your staff is busy—why not automate and integrate the NOA process?

Passport NOA does just that. Our solution saves valuable time that would otherwise be spent on the phone or chasing paperwork, eliminates potential for human error, and ensures the timely notice of inpatient hospital admittance to payers that keeps you in compliance—and maximizes revenue.

How we do it

- Passport NOA is an automated solution that helps you submit accurate patient admission data within the payer's required time frames
- The solution uses a simple data interface that keeps the NOA process within your workflow
- It pre-fills required patient and procedure information to eliminate errors that can occur with manual data entry
- It is available with both our online eligibility service, **OneSource** and in our integrated eligibility platform, **eCare NEXT®**
 - » Once eligibility has been verified, the NOA is automatically run for the payers that require it

Passport NOA's powerful integrated fax capabilities

- Receive, index, and split multiple document types
- Capture electronic information associated with a fax and attach to an incoming or existing order
- Convert faxed information to metadata for fast lookup and retrieval
- Integrate with document imaging systems to deliver documents in a cold-feed environment
- Desktop fax back to physician offices with built-in templates and directories

What you get

Passport NOA lets users check eligibility, then immediately submit payer NOA requirements in a single solution from the same workflow—with no delays or data errors that put reimbursements at risk.

Fulfills NOA requirements automatically and ensures submission is accurate by prefilling admission data

Provides a worklist of all pending NOAs to promote compliance

Lowers risk of reimbursements being reduced or delayed due to missed or inaccurate NOA requirements

Streamlines workflow efficiency by using a single user-friendly interface for eligibility and NOA requirements that frees staff from managing and changing NOA requirements

Removes the need to visit payer websites or call payers for admission notification

Reports product usage, workflows, productivity and financial results through our self-service **Power Reporting** portal so users can proactively identify and address issues that adversely affect workflows and payments
