- ACT webinar: Facts on Consumer Credit Reporting

“Given increased scrutiny from regulators, and a consumer base that is becoming more knowledgeable about their credit report and how it affects their lives, it is imperative that our data providers implement governance and processes to ensure the data reported to the bureaus is of the highest quality. I take my deep knowledge of the Metro 2[®] Industry Standards and passion for data accuracy and help our clients to comply with regulatory requirements, reduce operational risk and enable increased customer satisfaction.”

Julie Moroschan is a senior business consultant who works closely with the clients to engage on Data Integrity related opportunities, providing subject matter expertise in Metro 2[®] compliance, dispute management and data governance ensuring a differentiated experience for our clients.

Prior to joining Experian in March, 2014, she worked for more than 20 years in data reporting operations at a major competitor. She held multiple roles starting her career managing the data reporting relationships for Tier 1 customers, then supervised the team of analysts who managed those relationships. She was an active member of the Consumer Data Industry Association (CDIA) Metro 2[®] Task Force, responsible for developing, maintaining and enhancing the industry-standard reporting format, and training its users. In her most recent role, Julie created a formal enterprise-wide Data Standards and Governance team, responsible for identifying and resolving data related issues, promoting data quality, ownership, awareness and knowledge across the enterprise.

In her role in Experian Advisory Services, she engages with clients to improve the accuracy and integrity of their reported data, assists in creating policies and procedures for reporting and dispute management, and provides data analysis, guidance and best practices to improve data accuracy and promote compliance with regulatory obligations.
